

Hello, my name is [Luis Guillermo Cárdenas](#) I'm the Creator of [YOLO Animals](#) and CEO of [Crazy Qubits](#), an indie video game company in charge of its development.

YOLO Animals is what I call an **Online Multiplayer Eater Shooter**. In this game you start playing like a small animal that has to make his way through a hostile and funky low poly meadow, growing into different species and defeating other animals from around the world. You can eat other animals or blow them up nicely and gently with some of the awesome available power ups.

Here you can watch a quick [gameplay of the game](#).

Also, you can visit the official [YOLO Animals Online](http://YOLOAnimalsOnline.com) website to download it; it's available for many platforms.

Basic Game Rules:

- Every time you eat a heart, you grow and turn into a different animal.
- Animals can use power-ups and eat other animals to defeat them.
- Every time you defeat another animal you get a "Kill".
- Animals can only eat smaller animals.

More than 60 species are available, each of them with their own special characteristics. Easter eggs and humor references are hidden all over this awesome and beautiful low-poly meadow.

Game content:

- Multiplayer Online Survivor Mode.
- Forever alone Survivor Mode.
- Windows and android versions.
- More than 60 animal types.
- 9 power up types.
- Global leaderboard.

Youtubers love to play **YOLO Animals** check out some of their videos [here](#).

I'm looking forward to hear from you, regards 😊
